

ROBERTO DRAZEWSKI

Full Stack Web Developer & AI Engineer | Founder & CTO at Puma Code

 drazewski@gmail.com

 +54 261 651 2165

 Nerviani 97, Maipú, Mendoza, Argentina

 Remote (Worldwide), Hybrid, or On-site

Full Stack Web Developer and AI Engineer, and Founder & CTO of Puma Code, with over 10 years of cross-disciplinary experience spanning modern web development, hardware quality control (QA), PCB diagnostics, and telemetry systems. Expert in Machine Learning, integrating Artificial Intelligence into production projects to deliver predictive analytics, automation, and industrial fault-detection. Skilled in React, Next.js, Node.js, and Python, with strong command of manual and automated testing (Selenium), API testing (Postman), cybersecurity, and scalable cloud infrastructure. A unique background combining software, AI, and embedded hardware expertise enables deep system analysis and reliable defect detection across web, cloud, and industrial environments. Currently pursuing the ISTQB certification.

SKILLS

AI & Machine Learning

- Machine Learning Model Design
- AI Integration in Applications
- Predictive Analytics & Data Pipelines
- Industrial Fault-Detection Models

Full Stack Web Development

- React, Vite & Next.js
- TypeScript & JavaScript
- Node.js
- PHP & C++
- Python
- SQL (MySQL) & MongoDB

Cloud & Cybersecurity

- Scalable Cloud Deployments
- Secure-by-Design Frameworks
- Data Encryption Compliance

QA & Software Testing

- Manual & Regression Testing
- Selenium Test Automation
- Postman (API Testing)
- Test Case Design
- Bug Tracking (Jira)

Hardware & Telemetry

- PCB Diagnostics & Repair
- GPS Telemetry Systems
- IoT & Firmware (MQTT/HTTP)
- CAN-Bus & Serial Communication
- Firmware Flashing & Validation

IT & Tools

- IT Support & Troubleshooting
- Git
- phpMyAdmin
- Resend (Email API)
- ISO Standards

EDUCATION

Full Stack Web Developer

PROFESSIONAL EXPERIENCE

Puma-Code

Founder & CTO / Lead Full Stack & AI Engineer (Remote)

05/2026 – Present | Mendoza, Argentina

Build and ship full-stack SaaS for SMBs and international clients: React/Next.js front-ends, Node/Express APIs, PostgreSQL/MySQL. Integrate AI/LLM features into production apps (automated quoting assistant, AI-assisted anomaly detection on telemetry data). Own the full delivery lifecycle: architecture, deployment (Vercel/Render/Cloudflare), security hardening and performance.

Independent Software Consultancy

Full Stack Technical Consultant (Remote/Self-employed)

04/2024 – 04/2026 | Bristol, UK

- Designed and delivered custom web applications for SMBs, including booking platforms and internal administrative dashboards.
- Built and maintained pricing engines, booking flows, and admin panels using React/Vite, Node/Express, and MySQL.

Novanta Inc.

Hardware Systems Technician

09/2023 – 03/2024 | Barcelona, Spain

- Assembly, calibration, and testing of high-precision industrial hardware.
- Circuit-level troubleshooting to resolve issues during the testing lifecycle and minimize production downtime.
- Ensured compliance with ISO quality standards.

Sitrack.com

Production Operator (On-site)

06/2022 – 08/2023 | Mendoza, Argentina

- Tested and programmed GPS/microchip hardware on the production line; validated equipment before installation.
- Collaborated with the team to improve production efficiency and quality.

The Assemblies

Kitchen Management

06/2014 – 05/2022 | Bristol, UK

Led kitchen operations as Head Chef: team management, service delivery under high pressure, suppliers and quality control.

When COVID-19 disrupted the hospitality sector, I drew on my background as an electronic technician (embedded firmware) to start moving from hardware into software — the beginning of my career transition into tech.

Sitrack.com

Quality Control Specialist

03/2010 – 05/2014 | Santiago, Chile

Tested and ran new scripts and programmed GPS hardware devices on the production line.

Trained new operators during a period of strong company growth.

Quality Control Specialist

03/2006 – 03/2010 | Mendoza, Argentina

I was in charge to test and run all the new scripts, as I was also programming GPS hardware devices. Part of my job was to train the new operators, a product of an excellent company growing.
